

Physician Procedure Setup List

The following information has been provided to SenoRx from physicians who have had experience with Contura. You may adapt or alter to your specific requirements.

The items you will need for the Contura implant are as follows:

- 100cc sterile saline in sterile bowl
- 3cc Omnipaque or similar non-ionic contrast (optional. If you do not have this in the breast center, they can place it in radiation oncology later)
- 4x4 gauze (2 packs)
- Ultrasound probe cover
- Sterile ultrasound gel
- Non sterile ultrasound gel
- Chux (2)
- Betadine or Chloraprep to sterilize skin
- Dressing supplies (paper tape, 4x4 or split drain sponges)
- Lidocaine with or without epi
- 18 and 21Ga needles to draw up lido and inject
- 10cc syringe for lidocaine
- Sterile gloves
- Hemostats/straight Kellys or tonsil
